INSTALLATION CHECKLIST LUMIRANK & DID_V TO MYLAPS X2 CLUB

All items in the car?

- Is the X2 Racelink in the car with the 3 cables connected?
- Is the Driver Information Display in the car?
- Is the Lumirank Display in the car?
- Is the power cable connected to the Lumirank and the battery?
- Is the Lumirank button attached to the car next to the air jack lever?

System test with Power On

- Does the led display show the start number of the car?
- Does the Driver Information Display show "Ready"?
- Does the countdown start when you click on the button?

Antenna mounting on the roof

- Are the antenna's mounted on the roof?
- Are the antenna's mounted minimum 20cm from each other and other antenna's?
- Is the GPS cable not in a clutch inside the car?

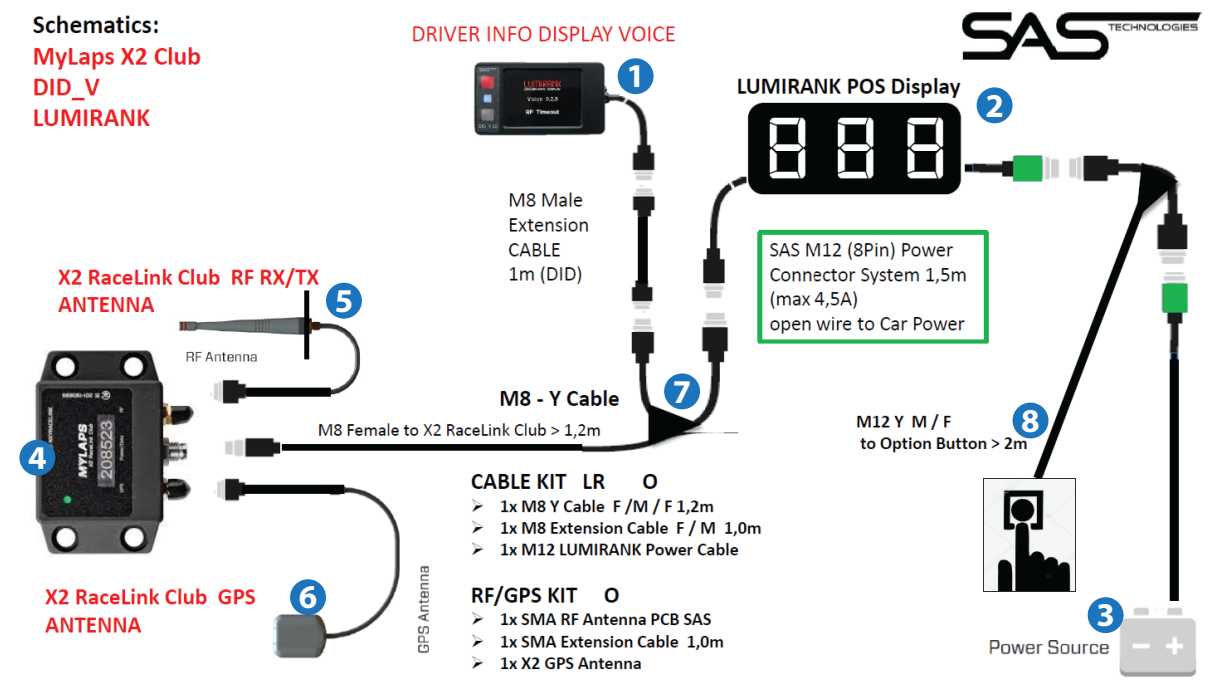

Driver information Display position

- Is the DID on the dashboard within the view of the driver?
- Is it connected properly to not get loose in the car?

When one answer to any question is NO, car is NOT TC approved

Schematics:

MyLaps X2 Club
DID_V
LUMIRANK

Lumirank display position and tape use

- Is the Lumirank display in the right position? (Passenger side, top corner, below streamer)
- Is the tape around the display mounted and **black**?
- Is the Velcro tape **black**?

GOOD EXAMPLE

- Under the front window streamer
- On the passenger side
- Black tape around the display
- Black Velcro used

WRONG EXAMPLES

- Inside the window streamer is **WRONG**
- White/Gray tape around the lumirank is **WRONG**

When Lumirank display is not in the right position or does not have the right Tape and/or Velcro used, car is NOT TC approved
